

### Space Renaissance International (SRI), what is

SRI (from our Statutes) “arises as a spontaneous union of people, sensitive to the development and practical experimentation of an open world philosophy, i.e. inclusive of the Earth and the entire Solar System. They constitute an international astronautic-humanist organization, at the service of all peoples and all regions of the world, dedicated to raising awareness that human expansion into space is fundamental for the sustainability of present civilization and its growth, especially for the survival of life itself”.

### Some opportunities for support and collaboration:

1. Join the SRI Crew: <https://spacerenaissance.space/membership/international-membership-registration/>
2. Apply as a volunteer: <https://spacerenaissance.space/volunteers/>
3. join some SR Academy committee(s): <https://spacerenaissance.space/apply-to-sr-academy-committees/>
4. subscribe to the “Space Renaissance Ambassadors” training course: <https://academy.spacerenaissance.space/space-renaissance-ambassadors-education-programme/>

### Or, you can use these qrcodes:

#### Join the SRI Crew:

#### Apply for some volunteer activities:

#### Choose your committee(s):

#### Subscribe to the Space Renaissance Ambassadors training course:

### Our proposal to U.N.

On September 18, 2023, Space Renaissance International will hold a panel at the United Nations General Assembly 78 Summit. Twenty-five experts from diverse scientific, philosophical, political, and legal disciplines will bring to the UN their views on an issue of paramount importance: **the need to update the 2030 Agenda for Sustainable Development.**

Since 2015, reusable rockets have dramatically decreased the cost of transportation from Earth to orbit. Such process is paving the path toward civilian space development and astropolitical uses of space as well, and is creating a growing interdependent relationship between life on and beyond Earth. 2015 can now be identified as a “turning point” in history, signifying a change of paradigm, from “traditional” aerospace to a “new space” age.

As soon as the U.N. 2030 Agenda<sup>[1]</sup> was published, some relevant criticalities appeared. The general criteria supporting the concept of sustainability developed by the agenda is an unquestioned limitation to the boundary of Earth’s atmosphere. The 2030 Agenda for Sustainable Development, adopted by all United Nations Member States in 2015, was conceptualized during the traditional aerospace age: outer space was not considered, as a dimension that helps to increase the sustainability of development. Space science and technologies are supporting social and environmental goals on Earth, for many years. Yet that will not be enough, to warrant a really sustainable development. To allow a real sustainable development, it is indispensable and urgent to start civilian space development, outside Earth boundaries. Therefore the UN 2030 Agenda of the Sustainable Development Goals needs to be updated. We propose an 18th SDG to be added: “Space for All, on Earth and Beyond – Civilian Space Development, Human Communities Living and Working in Outer Space”.

### #space18SDG

An 18th Sustainable Development Goal:  
 “Space for All, on Earth and Beyond - Civilian Space Development Human Communities Living and Working in Outer Space”

SPACE RENAISSANCE INTERNATIONAL

### Support the #Space18SDG

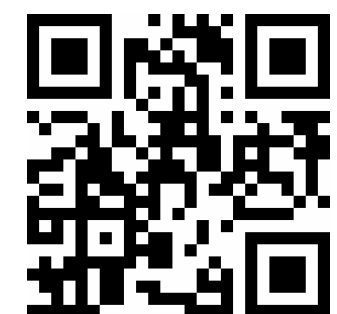

If we will arrive at the UN on September 18 with several thousand signatures, we will have a better chance of getting attention. This is clearly also a gamble: should the collected signatures be just a few hundreds, the chances to be considered of our proposal would be less than if we hadn't even started a pledge... due to our courage (or recklessness!). Therefore we really need a large mobilization: there is a need for you, who are reading this.

#### What you can do:

1) first **sign the petition** on Change.org, you just frame this qrcode with your cell phone:

2) **also sign on the Space Renaissance form**, you will then have the opportunity to add your organization, school or company to the group of promoters, and to stay in touch. Use this qrcode:

In addition, consider **joining the Association Space Renaissance International**: see how on the last page.
